

STUDENT MEDICATION POLICY

I. PURPOSE

The purpose of this policy is to set forth the provisions that must be followed when administering nonemergency prescription medications to students at school.

II. GENERAL STATEMENT OF POLICY

The school district acknowledges that some students may require prescribed drugs or medication during the school day. The school district's trained personnel including but not limited to, program coordinator, program administrative assistant, or other trained personnel designated by program coordinator, will administer prescribed medications, except any form of medical cannabis, in accordance with law and school district procedures. Medications will be kept in a locked cabinet in the office.

III. REQUIREMENTS

- A. The administration of prescription medication or over the counter drugs at school requires a completed, signed request from the student's parent. An oral request must be reduced to writing within two school days, provided that the school district may rely on an oral request until a written request is received.
- B. An "Administering Prescription Medications" form must be completed annually (once per school year) and/or when a change in the prescription or requirements for administration occurs. Prescription medication as used in this policy does not include any form of medical cannabis as defined in Minn. Stat. § 152.22, Subd. 6.
- C. Prescription medication must come to school in the original container labeled for the student by a pharmacist in accordance with law, and must be administered in a manner consistent with the instructions on the label; OTC medications must come to school in the original container.
- D. School personnel may request to receive further information about the prescription, if needed, prior to administration of the substance. The student must bring the medication to the office as soon as he/she arrives at school. All controlled substances/medications must be brought to the office by a parent/guardian (i.e. Ritalin, Adderall, Codeine). All medications given will be documented on the student's medication log.
- E. Prescription medications are not to be carried by the student, but will be left with the appropriate school district personnel. Exceptions to this

requirement are: prescription asthma medications self-administered with an inhaler (See Part J.5 below), and medications administered as noted in a written agreement between the school district and the parent or as specified in an IEP (individualized education program), Section 504 plan, or IHP (individual health plan).

- F. The school must be notified immediately by the parent or student 18 years old or older in writing of any change in the student's prescription medication administration. A new medical authorization or container label with new pharmacy instructions shall be required immediately as well.
- G. For drugs or medicine used by children with a disability, administration may be as provided in the IEP, Section 504 plan or IHP.
- H. A designated person, shall be responsible for the filing of the Administering Prescription Medications form and student medications log in the health records section of the student file. The designated person, shall be responsible for ensuring that a copy of such form is kept in the locked cabinet along with the medication.
- I. Procedures for administration of drugs and medicine at school and school activities shall be developed in consultation with a school nurse, a licensed school nurse, or a public or private health organization or other appropriate party (if appropriately contracted by the school district under Minn. Stat. § 121A.21). The school district administration shall submit these procedures and any additional guidelines and procedures necessary to implement this policy to the Governing Board for approval. Upon approval by the Board, such guidelines and procedures shall be an addendum to this policy.
- J. If the administration of a drug or medication described in this section requires the school district to store the drug or medication, the parent or legal guardian must inform the school if the drug or medication is a controlled substance. For a drug or medication that is not a controlled substance, the request must include a provision designating the school district as an authorized entity to transport the drug or medication for the purpose of destruction if any unused drug or medication remains in the possession of school personnel. For a drug or medication that is a controlled substance, the request must specify that the parent or legal guardian is required to retrieve the drug or controlled substance when requested by the school.
- K. Specific Exceptions:
 - 1. Special health treatments and health functions such as catheterization, tracheotomy suctioning, gastrostomy feedings, do not constitute administration of drugs and medicine;

2. Emergency health procedures, including emergency administration of drugs and medicine are not subject to this policy;
3. Drugs or medicine provided or administered by a public health agency to prevent or control an illness or a disease outbreak are not governed by this policy;
4. Drugs or medicines used at school in connection with services for which a minor may give effective consent are not governed by this policy;
5. Drugs or medicines that are prescription asthma or reactive airway disease medications can be self-administered by a student with an asthma inhaler if:
 - a. the school district has received a written authorization from the pupil's parent/guardian permitting the student to self-administer the medication;
 - b. the inhaler is properly labeled for that student; and
 - c. the parent has not requested school personnel to administer the medication to the student.

The parent must submit written authorization for the student to self-administer the medication each school year. In a school that does not have a school nurse or school nursing services, the student's parent or guardian must submit written verification from the prescribing professional which documents that an assessment of the student's knowledge and skills to safely possess and use an asthma inhaler in a school setting has been completed.

If the school district employs a school nurse or provides school nursing services under another arrangement, the school nurse or other appropriate party must assess the student's knowledge and skills to safely possess and use an asthma inhaler in a school setting and enter into the student's school health record a plan to implement safe possession and use of asthma inhalers;

6. Medications:
 - a. that are used off school grounds;
 - b. that are used in connection with athletics or extracurricular activities; or

- c. that are used in connection with activities that occur before or after the regular school day are not governed by this policy.

7. Nonprescription Medication.

A secondary student may possess and use nonprescription pain relief in a manner consistent with the labeling, if the school district has received a written authorization from the student's parent or guardian permitting the student to self-administer the medication. The parent or guardian must submit written authorization for the student to self-administer the medication each school year. The school district may revoke a student's privilege to possess and use nonprescription pain relievers if the school district determines that the student is abusing the privilege. This provision does not apply to the possession or use of any drug or product containing ephedrine or pseudoephedrine as its sole active ingredient or as one of its active ingredients. Except as stated in this paragraph, only prescription medications are governed by this policy.

8. At the start of each school year or at the time a student enrolls in school, whichever is first, a student's parent, school staff, including those responsible for student health care, and the prescribing medical professional must develop and implement an individualized written health plan for a student who is prescribed epinephrine auto-injectors that enables the student to:

- a. possess epinephrine auto-injectors;

or

- b. if the parent and prescribing medical professional determine the student is unable to possess the epinephrine, have immediate access to epinephrine auto-injectors of epinephrine in close proximity to the student at all times during the instructional day.

The plan must designate the school staff responsible for implementing the student's health plan, including recognizing anaphylaxis and administering nonsyringe injectors of epinephrine when required, consistent with state law. This health plan may be included in a student's § 504 plan.

9. A student may possess and apply a topical sunscreen product during the school day while on school property or at a school-sponsored event without a prescription, physician's note, or other documentation from a licensed health care professional.

School personnel are not required to provide sunscreen or assist students in applying sunscreen.

- L. "Parent" for student 18 years old or older is the student.
- M. Districts and schools may obtain and possess epinephrine auto-injectors to be maintained and administered by school personnel to a student or other individual if, in good faith, it is determined that person is experiencing anaphylaxis regardless of whether the student or other individual has a prescription for an epinephrine auto-injector. The administration of an epinephrine auto-injector in accordance with this section is not the practice of medicine.

A district or school may enter into arrangements with manufacturers of epinephrine auto-injectors to obtain epinephrine auto-injectors at fair-market, free, or reduced prices. A third party, other than a manufacturer or supplier, may pay for a school's supply of epinephrine auto-injectors.

- N. Procedure regarding unclaimed drugs or medications.
 - 1. The school district has adopted the following procedure for the collection and transport of any unclaimed or abandoned prescription drugs or medications remaining in the possession of school personnel in accordance with this policy. Before the transportation of any prescription drug or medication under this policy, the school district shall make a reasonable attempt to return the unused prescription drug or medication to the student's parent or legal guardian. Transportation of unclaimed or unused prescription drugs or medications will occur at least annually, but may occur more frequently at the discretion of the school district.
 - 2. If the unclaimed or abandoned prescription drug is not a controlled substance as defined under Minnesota Statutes § 152.01, subdivision 4, or is an over-the-counter medication, the school district will either designate an individual who shall be responsible for transporting the drug or medication to a designated drop-off box or collection site or request that a law enforcement agency transport the drug or medication to a drop-off box or collection site on behalf of the school district.
 - 3. If the unclaimed or abandoned prescription drug is a controlled substance as defined in Minnesota Statutes § 152.01, subdivision 4, the school district or school personnel is prohibited from transporting the prescription drug to a drop-off box or collection site for prescription drugs identified under this paragraph. The school district must request that a law enforcement agency transport the prescription drug or medication to a collection bin that complies with Drug Enforcement Agency regulations, or if a

site is not available, under the agency's procedure for transporting drugs.
